EXPERIENCE

Superworld, Remote — *Front-End Web Developer Internship*

December 2020 - Present

We are a startup company that is building an augmented reality
Site that sells virtual art. The tech stack we use includes React,
HTML/CSS, JavaScript, AWS, AWS S3, Node, Git, Multer, NPM,
Blockchain, Meta Mask, Ganache, and Postman.

Gigtor, Remote — *Full-Stack Web Developer Internship*

December 2020 - Present

We are working on a music website to help musicians find
venues. I am developing the website using HTML/CSS,
JavaScript, Node.js, Express.js, Tailwind.css, and Firebase.

CNSplit, Remote — *React Developer*

August 2020 - Present

We are a freelance group that develops websites that includes
Medical research, and small games. The tools I use are React,
Redux, HTML/CSS, JavaScript, Mongodb, and Mongoose.

EDUCATION

Kenzie Academy, Remote — *Front-End Web Developer*

January, 2020 - July, 2020

We built projects such as an Instagram clone, Slack Clone, and a Twitter
clone using HTML/CSS, JavaScript, React, Redux, node, express, and
multer.

Kenzie Academy, Remote — *Full-Stack Web Developer*

July, 2020 - January, 2020

We built amazing projects such as tracking the International Space
Station and creating a bug tracker. We used Python, Django, and Postgres.

PROJECTS

SKILLS

HTML/CSS
Blockchain
SASS
Bootstrap
Tailwind
Materialize
Gimp
Jira
Trello
Scrum/Agile
JavaScript
C#
Ruby
Java
Game Development
Graphic Design
Wordpress
Shopify
Unreal Engine
Unity 3D
C++
Context API
React
Redux
Mongodb
Mongoose
Postgres
SQL
SQL-Lite
NoSQL
AWS
Firebase
Postman
API
REST
Python
Turtle
Django

Knowrona — *knowrona.net*

A website to test your knowledge about the coronavirus that was built using HTML/CSS, JavaScript, React, Redux, Node, Mongodb, and Mongoose.

Kwitter— *https://github.com/daveguz97/kwitter*

A fun twitter clone I made using React and Redux.

Node
Express
Multer
NPM
PIP
Pipenv
virtualenv
Git
Version Control
Linux
Bash
Problem Solving
Team Work
Customer Service
Critical Thinking
Persistence
